

ACME INDUSTRIAL HOLDINGS LIMITED

Confidential information memorandum

1. Business overview

Acme Industrial Holdings Limited designs and manufactures precision hydraulic couplings for the offshore energy sector. The company sells directly to rig operators and through three regional distributors in Norway, Aberdeen and Houston. The group employs 214 people across two manufacturing sites.

2. Financial performance

Revenue for the financial year ended 31 December 2025 was 48.2 million pounds, up from 41.7 million pounds in the prior year.

Gross margin was 34.1 per cent in 2025 compared with 32.8 per cent in 2024. Adjusted EBITDA for 2025 was 9.6 million pounds.

The top three customers accounted for 62 per cent of revenue in 2025, and the single largest customer represented 31 per cent of revenue.

3. Market and competition

Principal competitors are Bergstrom Fluid Systems and Caldera Couplings. Bergstrom competes primarily on price in the North Sea market, while Caldera holds the stronger position in the Gulf of Mexico.

4. Key risks

The directors consider the principal risks to be customer concentration, exposure to the oil price cycle, and the pending renewal of the Houston site lease which expires in March 2027.
